GHS Signal Word:	Warning
GHS Hazard Phrases:	Harmful if swallowed. Causes skin irritation. Causes serious eye irritation. May cause repiratory irritation. May cause damage to respiratory system and lungs through prolonged or repeated exposure.
GHS Precautionary Phrases:	Avoid breathing dust. Wear protective gloves, protective clothing, and eye protection. Call a POISON CENTER or doctor/physician if you feel unwell.
GHS Response Phrases:	If eye irritation persists, get medical advice/attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing.
GHS Storage and Disposal Phrases:	Store in a diked or contained area to prevent uncontrolled release to the environment. Store in a closed container. If material cannot be completely used according to label directions, dispose of container and contents according to section 13.
Potential Health Effects (Acute and Chronic):	Chronic: Prolonged or repeated skin contact may cause dermatitis. Prolonged or repeated exposure may cause permanent eye damage. Chronic exposure may cause lung damage. Effects may be delayed.
Inhalation:	May be harmful if inhaled. Low hazard for normal industrial handling. The toxicological properties of this substance have not been fully investigated. May cause systemic effects. Material may be irritating to mucous membranes and upper respiratory tract.
Skin Contact:	May cause skin irritation. Dust causes mechanical irritation. Low hazard for usual industrial handling.
Eye Contact:	May cause eye irritation. Dust may cause mechanical irritation.
Ingestion:	May be harmful if swallowed. May cause gastrointestinal irritation with nausea, vomiting and diarrhea. Low hazard for normal industrial handling. The toxicological properties of this substance have not been fully investigated. May cause systemic effects.

3. Composition/Information on Ingredients CAS # Hazardous Components (Chemical Name) Concentration 57-13-6 60.0 - 100 % Urea 461-58-5 Dicyandiamide 0.500 - 1.50 % 872-50-4 N-Methyl-2-pyrrolidone 0 - 0.100 % 4. First Aid Measures **Emergency and First Aid** Procedures: In Case of Inhalation: Remove from exposure and move to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid. Get medical aid if irritation develops or persists. In case of contact, flush skin with plenty In Case of Skin Contact: of water. Remove contaminated clothing and shoes. Get medical aid if irritation develops and persists. Wash clothing before reuse. Wash off with soap and plenty of water. In Case of Eye Contact: Flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid. Do NOT allow victim to rub eyes or keep eyes closed. Get medical aid. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Call a In Case of Ingestion: poison control center. If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Signs and Symptoms Of To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated. Exposure: Treat symptomatically and supportively. Note to Physician: 5. Fire Fighting Measures Flash Pt: No data. Explosive Limits: LEL: No data. UEL: No data. Autoignition Pt: No data. Suitable Extinguishing Media: For small fires, use dry chemical, carbon dioxide, or water spray. For large fires, use dry chemical, carbon dioxide, alcohol-resistant foam, or water spray. As in any fire, wear a self-contained breathing apparatus in pressure-demand, Fire Fighting Instructions: MSHA/NIOSH (approved or equivalent), and full protective gear. Substance is noncombustible. Decomposes at high temperatures, resulting in toxic and corrosive products. Runoff from fire control or dilution water may cause pollution. Most of the components of this product are non-combustible. However, a portion of them Flammable Properties and Hazards: may support combustion at elevated temperatures. **Hazardous Combustion** Thermal decomposition may result in the production of ammonia, formaldehyde, biuret, Products: chlorine, cyanic acid, and cyanide, and oxides of carbon, nitrogen, phosphorus, potassium, sulfur, and chlorine, and oxides of alkaline earth metals, and certain heavier metals used as nutrients in fertilizer products, such as copper, iron, manganese, and zinc, and other toxic and irritating fumes and gases.

SAFETY DATA SHEET **ALLIED NUTRIENTS UFLEXX Manufacturing**

	Revision: 09/21/2020 Revision: 09/21/2020			
6. Accidental Release Measures				
Steps To Be Taken In Case	Use proper personal protective equipment as indicated in Section 8.			
Material Is Released Or	Spills/Leaks: Vacuum or sweep up material and place into a suitable disposal container.			
Spilled:	Avoid generating dusty conditions. Provide ventilation. Avoid runoff into storm sewe and ditches which lead to waterways. Do not let this product enter the environment			
	except as directed on product label. Clean up spills immediately, observing precautions in the Protective Equipment section.			

Personal precautions. Use personal protective equipment. Avoid dust formation. Avoid breathing dust. Ensure adequate ventilation.

Environmental precautions. Do not let product enter drains.

Pick up and arrange disposal without creating dust. Keep in suitable, closed containers for disposal.

PROCEDURES & PERSONAL PRECAUTIONS. Exercise appropriate precautions to minimize direct contact with skin or eyes and prevent inhalation of dust.

Methods for cleaning up. Sweep up, place in a bag and hold for waste disposal. Avoid raising dust. Ventilate area and wash spill site after material pickup is complete.

7. Handling and Storage

Use with adequate ventilation. Minimize dust generation and accumulation. Avoid Precautions To Be Taken in Handling: contact with eyes, skin, and clothing. Avoid ingestion and inhalation. Wash thoroughly after handling. Use only in a well-ventilated area. Keep container tightly closed. Wash clothing before reuse.

Provide appropriate exhaust ventilation at places where dust is formed.

Precautions To Be Taken in Store in a cool, dry place. Keep container closed when not in use.

Storing:

8. Exposure Controls/Personal Protection				
CAS #	Partial Chemical Name	OSHA TWA	ACGIH TWA	Other Limits
57-13-6	Urea	No data.	No data.	No data.
461-58-5	Dicyandiamide	TWA: 5 mg/m3	CEIL: 5 mg/m3 (salts)	No data.
872-50-4	N-Methyl-2-pyrrolidone	No data.	No data.	No data.

Raw Material Blend (46-0-0) Mini			
A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant respirator use. Where protection from nuisance levels of dusts are desired, use type N95 (US) or type P1 (EN 143) dust masks. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges.			
Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166.			
Wear appropriate protective gloves to prevent skin exposure. Wash and dry hands.			
Wear appropriate protective clothing to prevent skin exposure. Choose body protection according to the amount and concentration of the dangerous substance at the work place.			
Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate ventilation to keep airborne concentrations low. Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.			
Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. Wash thoroughly after handling.

		12. Ecological I	nformation			
General Ecological Information:		Environmental: If released to the atmosphere, urea will degrade rapidly in the vapor-phase by reaction with photochemically produced hydroxyl radicals (half-life of 9.6 hr). If released to soil, urea is hydrolyzed to ammonium through soil urease activity (the basis of its use as a fertilizer). The rate of hydrolysis can be fast (24 hr); however, a number of variables (such as increasing the pellet size of the fertilizer) can decrease the degradation rate.				
		Do not empty into drains.				
	Urea will dissolve and disperse in water, and will promote algae growth which ma degrade water quality and taste. Notify downstream water users of any release th affect water quality.			•		
Persistence and Degradability:		No data available.

Bioaccumula	ative Potential:	No data available.			
Mobility in S	011:	No data available.			
		13. Disposal	Considera	tions	
Waste Dispo	osal Method:	If material cannot be completely used according to label directions, dispose of container and contents according to this section.			
		Contact a licensed professional waste disposal service to dispose of this material.			
		Do not let product enter drains.			
		Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts 261. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.			determination are listed ult state and local
		RCRA P-Series: None listed. RCRA U-Series: None listed.			
		Observe all federal, state, and local environmental regulations.
